The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply									
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Snider (4471250).

Regarding claims 1 and 5, Snider shows a fan motor structure, comprising:

- A fan base (51);
- A bearing assembly (59) mounted on the fan base;
- A fan hub (3) formed with an extrusion (21) protruding from a top planar surface (surface outside 13) of the fan hub; and
- A shaft (41) fit into the bearing assembly and connected to the fan hub, the shaft having one end (19) protruding from the top planar surface of the fan hub to form an extension portion enclosed by and in close connection with the extrusion of the fan hub.

Regarding claims 2-4 and 6-11, it is noted that Snider also shows all of the limitations of the claimed invention.

3. Claims 12 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Muller (Re34268).

Application/Control Number: 10/799,420

Art Unit: 2834

Regarding claim 12, Muller shows a fan motor structure, comprising:

Page 3

- A fan base (30a);

- A bearing assembly (48) mounted on the fan base;
- A shaft (12) fit into the bearing assembly
- A fan hub (70); and
- A sleeve (Figure 2) embedded between the shaft and the fan hub
- Wherein, the shaft has one end protruding from the bottom surface of the fan
 base or a top planer surface of the fan hub, and the shaft has one part
 enclosed by and in close connection with the sleeve.

Regarding claim 14, it is noted that Muller also shows all of the limitations of the claimed invention.

4. Claims 12 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Maruyama et al. (4603271).

Regarding claim 12, Maruyama et al. shows a fan motor structure, comprising:

- A fan base (4);
- A bearing assembly (13) mounted on the fan base;
- A shaft (14) fit into the bearing assembly
- A fan hub (6); and
- A sleeve (15) embedded between the shaft and the fan hub
- Wherein, the shaft has one end protruding from the bottom surface of the fan
 base or a top planer surface of the fan hub, and the shaft has one part
 enclosed by and in close connection with the sleeve (Figure 2).

Application/Control Number: 10/799,420 Page 4

Art Unit: 2834

Regarding claim 14, it is noted that Muller also shows all of the limitations of the claimed invention.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 7. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Maruyama et al. in view of Huang et al. (6509666).

Regarding claim 13, Maruyama et al. shows all of the limitations of the claimed invention except for the copper bushing.

Huang et al. uses copper bushing for the purpose of making a motor fan.

Art Unit: 2834

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to make the bushing of copper as taught by Huang et al. for the purpose discussed above.

Information on How to Contact USPTO

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dang D Le whose telephone number is (571) 272-2027. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Darren Schuberg can be reached on (571) 272-2044. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
